

Meeting Number: 3
Date and Time: 01.02.2026 – 16:00

Present:

Hannah Arnold
Christopher Mead
Max McGill
Rachel Kirkham

(One member was absent, let us know in advance and is going to be updated when available).

Items for discussion:

Proposal ready for 03/02/2026.

To bring all of our ideas together and come to a consensus on how we would like to approach the design and movement of this project.

Document proposal under the assumption it was to be reviewed later on as ideas may change over time.

Record of discussion

Decided on a stand-alone base weighted to allow balance and sturdy placement even when soap liquid gets low it won't tilt or tip over. Track geared movement with a 360 servo (though this could change later upon more revision). Design techniques we like most are 3D scanning, haptic pen and blender to make individual parts of the project, with the use of 3D printing and silicone printing.

Action No.	Action Required	Success criteria	By When	By who
1.	Have approval meeting with tutor (Luke Emery) to determine whether the project is do-able.	100%	03/02/2026	ALL
2.	Discuss next steps during tutorial as a group.	100%	03/02/2026	ALL
